

INFORMATION SECURITY MANAGEMENT POLICY

In the face of the growing competitiveness in the technology sector and increasing demands from users, the management of 2CODERS STUDIO S.L. considers information security and quality in its management system as fundamental aspects. The objective is to provide services recognized for their quality, with optimal reliability indices, ensuring the correct levels of information confidentiality, and maintaining data integrity.

Service quality is a strategic objective of our Integrated System, offering a quick response to achieve complete customer satisfaction, surpassing expectations, and gaining recognition in the sector, all while ensuring a commitment to continuous improvement.

As a service company, 2CODERS STUDIO S.L. aims to ensure that the quality and security it offers are a true reflection of the expectations of each user and stakeholder, ensuring the company's future success.

To achieve these objectives, the management provides adequate resources for the maintenance and improvement of the Information Security Management System in accordance with ISO 27001. The management actively participates in establishing and monitoring security strategic objectives, as well as reviewing the Integrated System. Necessary training actions in information security management are also carried out.

In all its activities, the company firmly adheres to compliance with current legislation, especially regarding the protection of personal data and the provision of services, as well as fulfilling contractual commitments with users and third parties.

To implement the principles mentioned above, the Management, aware of the importance of quality in the management of our system and information security,

has decided to implement a Management System based on the UNE-EN ISO/IEC 27001 standard in our processes.

This management declares and assumes the following principles:

- Quality in our management and information security is a collective effort across all areas of the company.
- Each member of 2CODERS STUDIO S.L. is responsible for the information assets of their work.
- The management is responsible for driving the implementation of this policy, verifying its execution through audits.
- The application of this policy requires the active integration of the entire human team of the company. To achieve this, the management considers motivation and training as priorities.
- This Management commits to fulfilling the requirements and continually improving the effectiveness of the Management System.

To fulfill this policy and guide us toward our set direction, leadership, and consequently, the progress and well-being of the people who make up the organization, we must keep in mind two aspects that will help us achieve this objective:

- Correctly identifying errors is the only way to continuous improvement.
- The organization is a chain, each of us only a link; our teamwork and strong commitment are what set us apart and make us unique.

Management:

David Santana Molina

CEO

2CODERS STUDIO, S.L.
